

## Private Equity/Health Care

Benesch's Health Care Practice Group and Private Equity Group have extensive experience representing private equity firms in their investment in the health care industry. We have also represented health care companies and providers, including long term care providers, institutional pharmacies, preferred provider organizations, third party administrators, psychiatric hospitals and managed care organizations. With this background, Benesch is uniquely situated to provide representation of private equity firms in their merger and acquisition transactions and ongoing representation of the portfolio companies in this dynamic industry.
